Subject: SPOT REPORT - WV Water Incident Reported by WV Health

Situation:

WV Health Department notified HHS Region 3 Office @ 12:20 pm of some actions the State has taken related to sightings of a **frothy white substance in the Elk River near Freedom**

Industries around 11 am. Frothing is seen in other parts of the river. State suspects that it is a natural phenomenon or that something else has been put into the water.

(Note: Freedom Industries was company that released chemical into Elk earlier this year and is currently not operating).

Actions:

- Water intake company just downstream closed intake from river for two hours but has since re-opened.
- State Environmental Protection took samples and they are being processed.
- State EOC and WV Health are on alert and monitoring.
- Should the situation escalate, State Health will contact HHS Region 3 to convene a Technical Assessment Call with State EMA, State Health, FEMA R3, R3 EPA and ATSDR.
- No ESF 8 federal requests.
